Duties: You will perform disassembly, repair, reassembly and testing of gasoline and/or diesel engines, precise power generator units, electrical systems, electronic governing systems, remote switching systems, compressors, hydraulic and pneumatic systems, electrical and mechanical systems and field operation powered support systems. Repairs, adjusts, rebuilds, and installs rings, pistons, main bearings, connecting rods, carburetors, fuel pumps, generators, alternators, and other electrical and mechanical systems related to powered support systems. Works with maintenance team to repair, modify, test and troubleshoot heavy duty mobile equipment and vehicles with internal combustion engines including construction and industrial equipment. Under close supervision removes, dismantles, cleans, repairs or replaces differentials, crankshafts, front and rear axle assemblies, steering, fuel, exhaust, cooling, starting, generating, ignition, carburetion and other assemblies and systems. CONT'D BELOW

About the Position: Tobyhanna Army Depot is the largest, full-service electronics maintenance facility in the Department of Defense with a total installation work force of more than 4,400. The depot's mission includes design, manufacture, repair and overhaul of hundreds of electronic systems for all branches of the Armed Forces. They include satellite terminals, radio and radar systems, secure communications, electro-optics, night vision and anti-intrusion devices, airborne surveillance equipment, navigational instruments, electronic warfare, and guidance and control systems for tactical missiles. For over 50 years, Tobyhanna personnel have built a tradition of unparalleled customer satisfaction through the delivery of timely, cost-effective, and high-quality products and services. Located in Northeastern Pennsylvania, near Stroudsburg, Scranton and Wilkes-Barre, the depot is readily accessible to major East Coast cities, interstate highways, railways, international airports, colleges and universities.
